This section presents the top training courses most in demand in the job market

Digital Skills Framework

Skills Framework for Information Age((SFIA))the most comprehensive framework for defining and describing the professional and behavioral skills of workers in the areas of communications and information technology.

[Know more about SFIA](#)

Cooperative Training

Within the Future Skills initiative, We are seeking, in cooperation with many government and private sectors, to present the "cooperative training" track. It's one of the main tracks to build training partnerships, where students can in the cooperative training phase viewing the opportunities offered in communications and information technology fields.
